

How to resolve the 'VCRUNTIME140.dll is missing' on Windows 10 PC.

Cause of the issue:

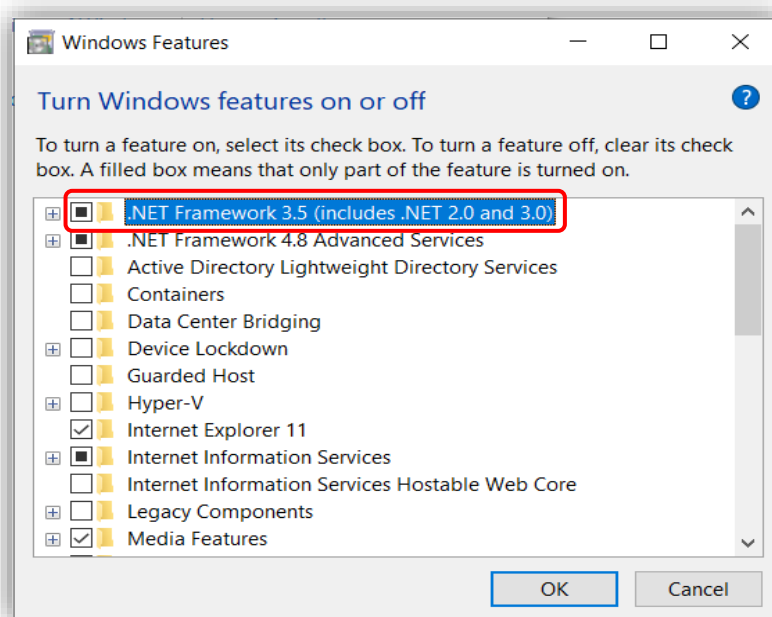

The issue can be observed when the VCRUNTIME140.dll file has been either corrupted or deleted from the Windows 10 PC.

Steps to resolve the issue.

1. Uninstall the currently installed DSVS 2.0
2. Disable the Anti-Virus on your PC before proceeding.
3. Go to Control Panel >> System & Security >> Windows Defender Firewall >> Turn Off Windows Firewall for both Private and Public Networks.

4. Go to Control Panel >> Programs & Features >> Turn Windows Features ON & OFF >> Enable NET Framework 3.5 and click on OK

5. Download the latest Microsoft Visual C++ Redistributable 2015-2019 file

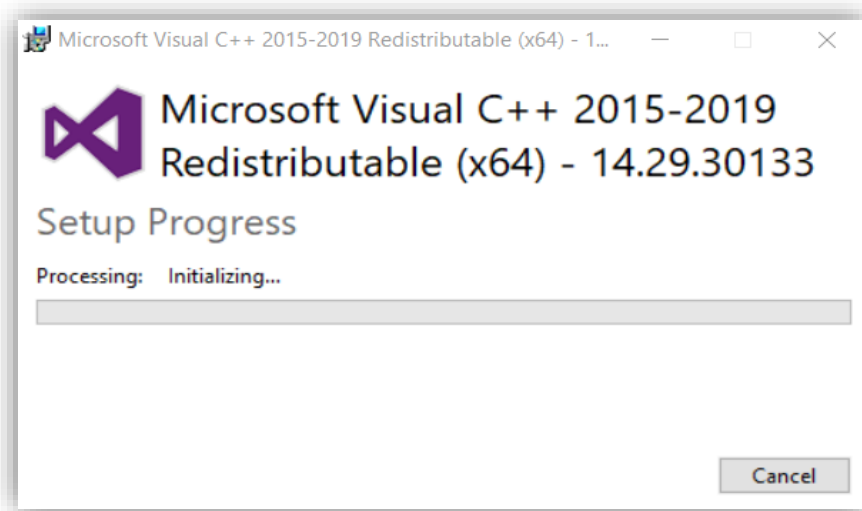

If you have a 64-bit system, select vc_redist.x64.exe.

Link to download: https://aka.ms/vs/16/release/VC_redist.x64.exe

If you have a 32-bit system, select vc_redist.x86.exe.

Link to download: https://aka.ms/vs/16/release/VC_redist.x86.exe

6. Install the downloaded latest Microsoft Visual C++ Redistributable file (Right-click and Run as Administrator)

7. After the Installation of Microsoft Visual C++ Redistributable file is complete successfully, Restart the PC and reinstall the DSVS 2.0 and check is issue is resolved.

Please Note: The same steps will work for the below error as well

Error: 'The application was unable to start correctly (0x000007b)'
