

INSTRUCTION MANUAL
V1.0

High Definition HD-VI
CMOS Technology High Resolution Sensor

P/N 101-090-0080-01 V1.0

Product Made in China under ISO9001 & ISO1400 standards
Manual Printed in China v1.0

Camera setup and installation guide.

Introduction

New megapixel CMOS solution, HDVI has state-of-the-art technology to give the best image quality ever. Especially it is designed to meet the demands of new trend in CCTV market, both Analog HD Camera and cost-effective HD-SDI applications. The main concept of NVP2431H is supporting 1.3M CMOS sensor and output I/F as analog 1280H(CVBS/ COMET), HDVI 1.0(960p)

- 1Megapixel/2Megapixel HDVI camera
- 500 Meter Coaxial cable distance
- Programmable AE/AWB/AF detection
- 3D-NR(Noise Reduction) for HDVI 1.0
- Defog DWDR
- Dead pixel compensation(live/static)
- User defined OSD

■ WARNING !

To avoid electrical shock, do not open the cabinet. Refer servicing to qualified personnel only.

■ NOTE !

Before Use

1. Do not lift the camera by only holding the cables.
2. If you find condensation before use, remove the front cover and leave the camera open until the condensation has gone.

Operating or storage location

Avoid operating or storing the camera in the following locations:

1. Extremely hot or cold places (operating temperature : -10°C to +55°C).
2. Close to heating equipment (e.g., near heaters)
3. Close to sources of strong magnetism.
4. Close to sources of powerful electromagnetic radiation, such as radios or TV transmitters.
5. Locations subject to strong vibration or shock.
6. Locations subject to steam or high humidity.
7. Locations subject to strong wind, such as high places.
8. Locations where corrosive gas or flammable gas is emitted, or where salt damage may occur.
9. Location subject to condensation and high humidity.
10. Location subject to soot or oil stains.

■ Camera setting

Don't touch the PCB Board by hand directly.

■ Ventilation

To prevent heat buildup, do not block air circulation around the camera

Guide

Model Features:

- HD-VI Technology
- 1MP/2.0MP CMOS
- Up To 500 Meters
- 3D DNR
- BNC Video Output
- Standard 12VDC Operation
- IR LED for Night Vision
- True Day/Night ICR

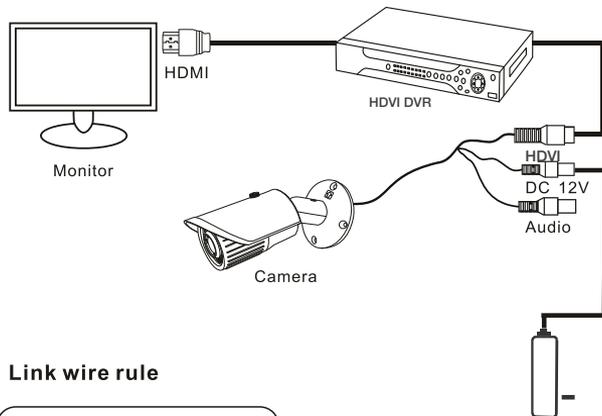

Solution General Specifications

General	
IR LED	24/ 30 / 36pcs IR LED (Model Dependant)
Resolution	1280(H) x 960(V) @ 25fps 1920(H) x 1080(V) @ 25fps
Min. Illumination	0.01lux@F1.2(AGC ON), 0 Lux IR LED On
Lens	Varifocal 2.8-12 mm or Fixed Lens models 2.8/3.6/4mm
Lens mount	Fixed mount
ACG / BLC	Auto
WB	AWB
Sync System	Internal
E-Shutter	1/25s~1/500,000s
Video output	1 channel HDVI high definition video output
S/N Ratio	More than 48dB (AGC OFF)
Video output	BNC Connector
Ingress	IP66
Power Consumption	DC12V ,Max 2W
Operating temperature	-10°C ~ +55°C / -40°F ~ 122°F
Operating humidity	0-90% (non-condensing)

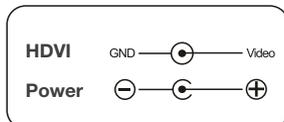

*Specifications subjected to change without prior notice.

Connection

Schematic of the system

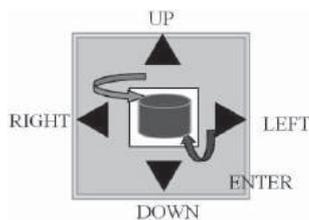

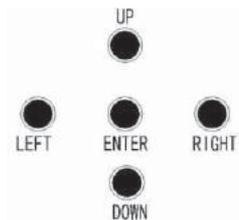

Link wire rule

Schematic of the system

OSD Menu Button

ENTER	Enter or Exit the menu, Press ENTER into Main Menu.
UP/DOWN	UP and DOWN for move up and down
LEFT/RIGHT	LEFT, RIGHT for modifying the menu parameters, press RIGHT to exit the next menu and modify the parameter.

Attention

Turn Left for 5seconds to CVBS, turn Right for 5 seconds to HDVI. Turn Down for 5seconds, will change TV system between PAL/NTSC.

OSD(OPTIONAL)

Press the "ENTER" to enter main menu, if there is no any press for 30 seconds, the main menu will disappear automatically from screen.

MAIN MENU	
1. LENS	MANUAL
2. EXPOSURE	←
3. BACKLIGHT	OFF
4. WHITE BAL	MANUAL ←
5. DAY&NIGHT	EXT ←
6. NR	←
7. SPECIAL	←
8. ADJUST	←
9.EXIT	SAVE&END ←

Lens

DC/Manual, depending on the specific type of lens the device is equipped.

Exposure

EXPOSURE	
1.SHUTTER	1/25
2.AGC1.....15
3.SENS-UP	OFF
4.BRIGHTNESS1.....40
5.D-WDR	OFF
6.DEFOG	OFF
7.RETURN	RET ←

- (1) Electronic Shutter:User can set both slow and high-speed shutter.(The speed can be set as auto, from 1 / 25 ~ 1 / 500000, FLK, X2~X30. The user can set the specific speed according to the specific surroundings. The default value is auto.)
- (2) AGC:This function not only increase the brightness of camera images, but also increase the image noise, users can adjust it according to actual situation,0~15 adjustable.
- (3) Sens-Up
- (4) Brightness: 0~100 adjustable.
- (5) D-WDR:Digital Wide Dynamic Range:Off/On,if turn on,level:0-8 adjustable
- (6) Defog:In foggy weather,you can setup this function to see the object behind fog clearly.choose Auto to adjust position/size.
- (7) Return

Back Light Compensation

(1)BLC

BLC	
1.LEVEL	MIDDLE
2.AREA	←
3.DEFAULT	←
4.RETURN	RET ←

- (a) Level:Middle/High/Low (b) Area:enter in to adjust position/size (c) Default (d) Return
- (2) HSBLC

(2)HSBLC

HSBLC	
1.SELECT	AREA1
2.DISPLAY	ON ←
3.BLACK MASK	ON
4.LEVEL1.....20
5.MODE	ALL DAY
6.DEFAULT	←
7.RETURN	RET ←

(a) Select:4areas optional (b) Display:On/Off,choose On,enter in to adjust position/size (c) Black mask:On/Off (d) Level:0~100 adjustable (e) Mode:All day/Night,night mode:AGC level:0~100 adjustable (f) Default (g) Return

White Balance

It is used to restore the authenticity of the color, affected by the change of color temperature. Users can choose white balance mode according to the actual situation: Manual/AWB/ATW/AWC/Indoor/Outdoor.

Day&Night

Day & Night Switch is specially designed for different occasions. There are 3 kinds of modes as follows: EXT Mode,Auto mode, Color mode, B/W mode. The user can set different mode according to the surroundings.The default mode is EXT mode.

(1)D&N EXT

D&N EXT	
1.D->N (DELAY)I.....1
2.N->D(DELAY)I.....1
3.RETURN	RET ←

(2) D&N Auto

D&N AUTO	
1.D->N (AGC)I.....48
2.D->N (DELAY)I.....3
3.N->D (AGC)I.....32
4.N->D (DELAY)I.....3
5.RETUR	RET ←

(3) Color Mode:Always Color
 (4) B/W Mode:Always Black and White

NR

Switch to Hight/Middle/Low and OFF to enable or disable noise reduction on dynamic recordings.

NR	
1.2DNR	MIDDLE
2.3DNR	MIDDLE
3.RETURN	RET ←

Special

SPECIAL	
1.CAM TITLE	OFF
2.D-EFFECT	←
3.MOTION	OFF
4.PRIVACY	OFF
5.LANGUAGE	ENG ←
6.DEFECT	←
7.RS485	←
8.RETURN	RET ←

(1) Cam Title
 (2) D-Effect

D-EFFECT	
1.FREEZE	OFF
2.MIRROR	OFF
3.NEG IMAGE	OFF
4.RETURN	RET ←

(a)Freeze:On/Off.
 (b)Mirror:Mirror/V-Flip/Rotate/Off.
 (c)Neg_Image:On/Off.
 (d)Return

(3) Motion: Select motion areas, Display, Sensitivity, Color, Trans, Alarm.

MOTION	
1. SELECT	AREA1
2. DISPLAY	ON ←
3. SENSITIVITY1.....64
4. COLOR	GREEN
5. TRANS	1.00
6. ALARM	←
7. DEFAULT	←
8. RETURN	RET ←

1. Sharpness: Auto/Off.
2. Monitor: LCD/CRT.
3. LSC: Off/On.
4. Video.Out: PAL/NTSC
5. Return

Exit

When all settings are complete, press "Up", "Down" to move the cursor to "Exit", select "Save&End" (save the changes of parameters and then exit the menu) or "Reset" (it means to recover factory settings) or "Not Saved" (Not save the settings and Exit the menu).

(4) Privacy: Select privacy areas, Display, Color, Trans.

PRIVACY	
1. SELECT	AREA1
2. DISPLAY	COLOR ←
3. COLOR	WHITE
4. TRANS	1.00
5. DEFAULT	←
6. RETURN	RET ←

(5) Language

Simplified Chinese, traditional Chinese, Germany, French, Italian, Spanish, Polish, Russian, Portuguese, Turkish.

(6) Defect: Press to select the DPC (Defective Pixel Correction) level of defect. please do not use this function without cover the lens.

(7) RS485: press button to select ID, ID DISPLAY and BAUDRATE.

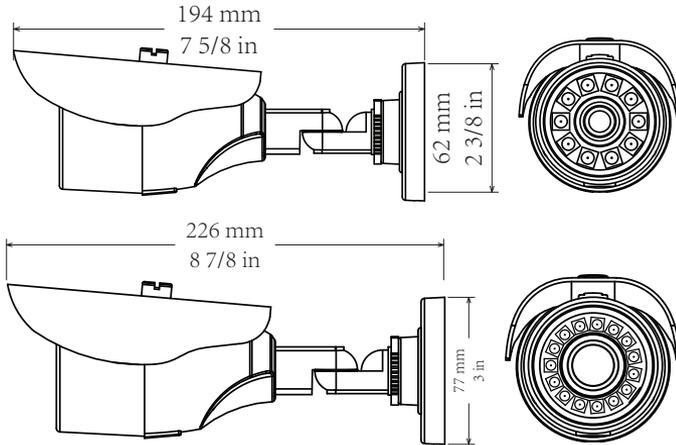

(8) Return

Adjust

ADJUST	
1. SHARPNESS	AUTO ←
2. MONITOR	LCD ←
3. LSC	OFF
4. VIDEO.OUT	PAL
5. RETURN	RET ←

Accessories

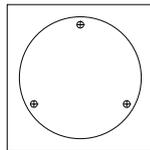

(A) Wall Plugs
S7 x 26mm 3pcs

(B) Fitting Screws
PA4 x 24mm 3pcs

(C) L-Hex tool
54x18mm

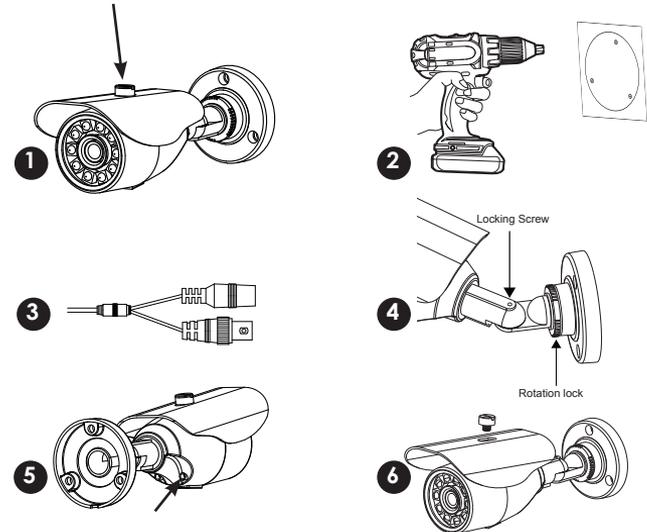

(D) Drill template

NOTE: Make sure you don't have any missing parts before you make the installation. Incorrect installation could void the warranty if instructions are not followed correctly. Please call technical for assistance if you are unsure about any procedures.

Installation

Installation information (General overview)

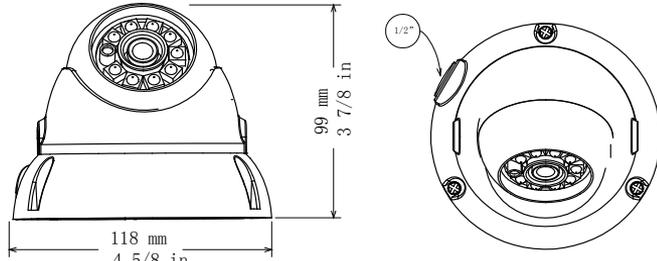

- 1 Remove visor from camera to aid simpler installation. (Optional requirement)
- 2 Use drill template (D) as to guide to drill and attach camera to surface as required. Holes on bracket are 120 degree apart, so three holes are required.
- 3 With camera attached you can now connect power, check device working.
- 4 Using the (C) L-Hex tool you position left-right up/down and lock into place. The rear position rotation allows turning of angle turn anti-clockwise to loosen.
- 5 Adjust zoom & focus using small flat blade. (Vari-focal model only)
- 6 Replace the sun visor if removed from step 1. Check IR LEDs are working by covering the photocell of camera, the IR LEDs will give a faint red glow.

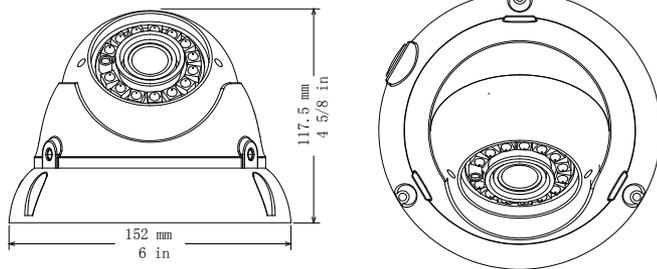

(Don't look at IR LEDs for long periods of time, as you could damage your eyes)

Accessories

NOTE: Make sure you don't have any missing parts before you make the installation. Incorrect installation could void the warranty if instructions are not followed correctly. Please call technical for assistance if you are unsure about any procedures.

Installation

Installation information (General overview)

- 1 Use supplied template to drill holes for (A) plugs.
- 2 Remove locking cover using supplied (C) L-key. Optional requirement
- 3 Attach base part to surface with (B) screws. Use conduit if required.
- 4 Re-attach Cover and position camera then lock cover screws with L-Key.
- 5 Adjust the zoom & focus using flat blade tool. (Vari-Focal models only)
- 6 Connect power, feeding through conduit may require this stage to be completed before adjustment is made. Check IR LEDs are working by covering the photocell of camera, the IR LEDs will give a faint red glow. (Don't look at IR LEDs for long periods of time, as you could damage your eyes)
