

## Steps to take Back up on USB Drive on D-Link DVRs

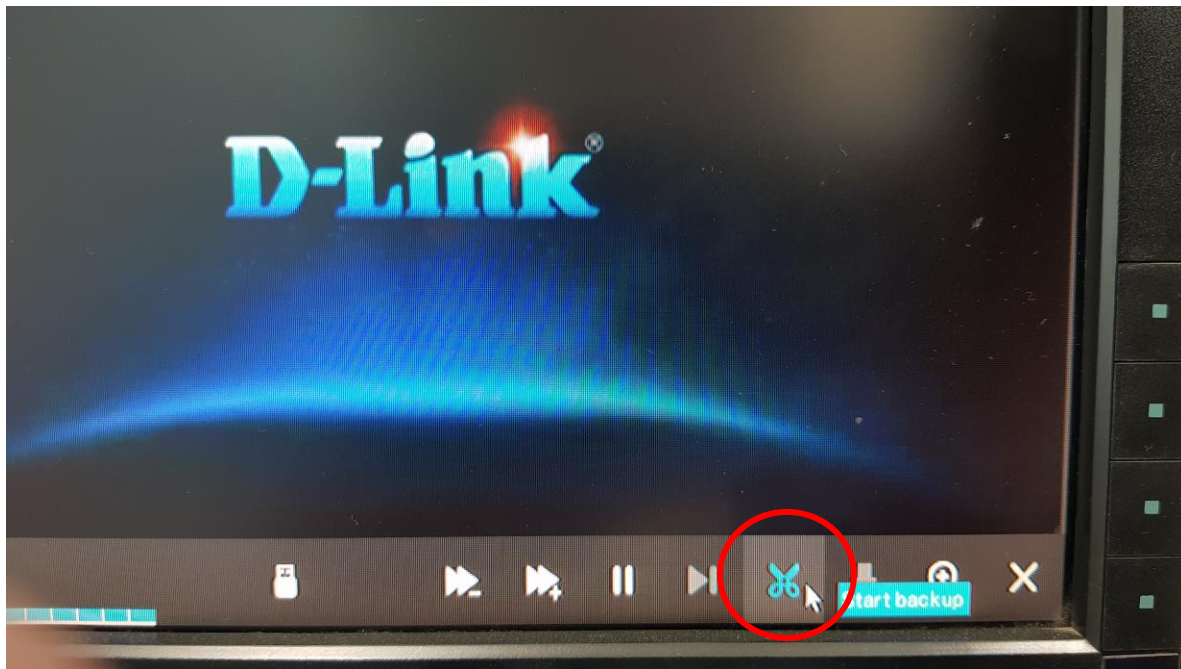

- 1) Login to DVR through the VGA/HDMI interface
- 2) Take the cursor to the bottom right side of the screen to reveal the Playback option.

- 3) In playback mode you will be able to view previously recorded recordings. Click on Playback option to access it
- 4) Once the Pen Drive is connected to the DVR it will indicate the same on the screen in the Playback window

5) Click on Start Backup icon to start saving the recording in the Pen Drive connected.

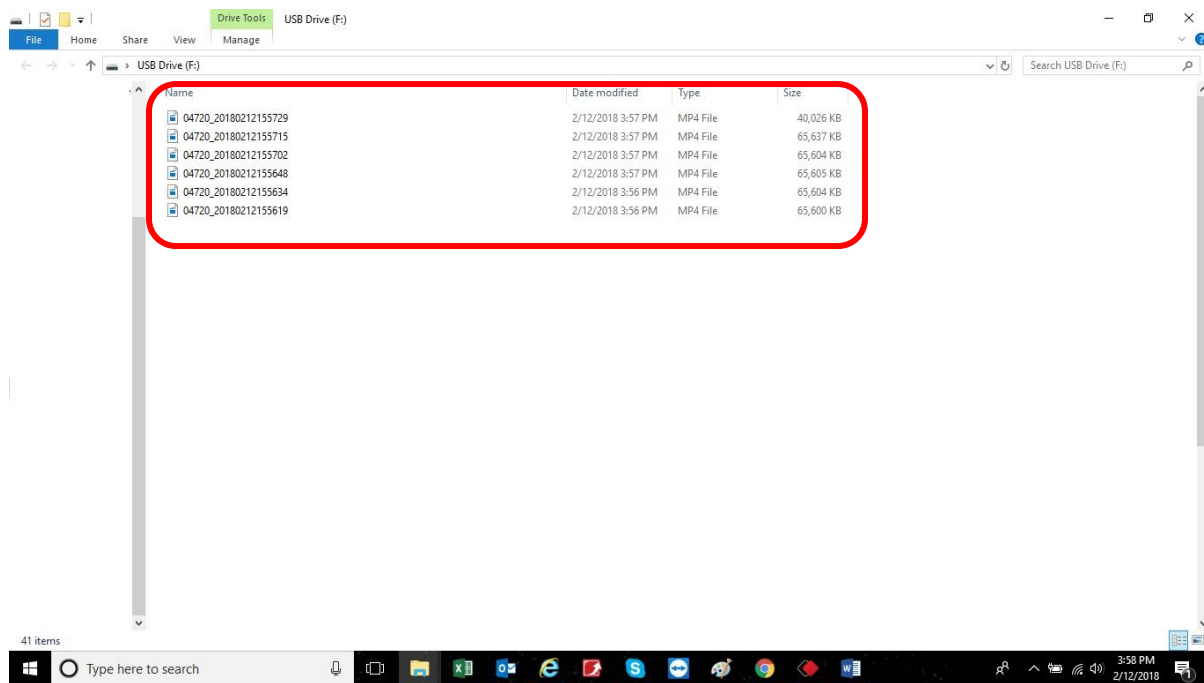

6) Once the Backup has started the USB icon will turn Blue and Start blinking and the video time line will shift automatically at increased speed towards the right.

7) Click on End Back up to stop the back up or wait till the recording his over.

8) Connect the USB drive to PC after disconnecting it from DVR to transfer the Back up to PC. The backup will not be saved as a single file but, as multiple files of maximum 65MB size.

9) That concludes the module to take backup on the USB Drive.
